

PhD course

1 October 2015

The PhD School and Changing Disasters invite all PhD students within the discipline of disaster studies to a course on

ADVANCES IN DISASTER RESEARCH

The PhD course, **Advances in Disaster research**, takes place on the 7-8 December and seeks to bridge disaster research among different disciplines – aiming at multidisciplinary rather than specialization. The ultimate aim is to gather participants from many research environments and disciplines, in order to broaden horizons, discuss definitions and challenge and develop methods and viewpoints. The course is co-organized with the NEEDS-conference, and grants the opportunity to discuss and refine papers at the PhD course before presenting at the conference.
